

High Street Primary

Dosbarth Seren

Week Beginning: 27th June 2022

This Week's Highlights

This week we have been busy exploring how our brains work. We have learnt about the different parts of the brain and how these parts connect to help us to manage our emotions. We created some fantastic self-portraits and thought about what fills our 'upstairs and downstairs brains'

We have also been busy mathematicians. We went on a walk finding acute, obtuse, and right angles in the local environment. We used the platform of Seesaw to complete learning tasks to further consolidate our learning!
